ABOUT YOUR FAMILY TREE READING

Your personalized Ancestral Influences Report analyzes your given name at birth and the name of the ancestors you choose to explore. Last names are an important part of your Numerology chart. They add letters and numbers to your Karmic Lesson and Hidden Passion charts and are the sole influence of your Spiritual Transit. This Transit is an important cycle reflecting your inner/spiritual evolution and that of your forebears. Your Ancestral Report provides a glimpse into characteristics you have inherited from those who came before you.

ANCESTRAL INFLUENCES AND NUMEROLOGY - ANCESTRAL DNA

Numerology is an ancient system for studying patterns and cycles. One such pattern demonstrates the enduring influence of the last name carried from generation to generation. A family name can remain unchanged since its origin. However, it sometimes loses or gains a letter or two or is altered entirely due to changing circumstances, such as immigration. These changes are reflected in your ancestor's evolutionary path. When their name changed, their lifestyle, environment and personality did as well. These traits are a component of your family's evolving ancestral "DNA" passed down through the years.

In most cultures, children adopt the last name of their father, and an in-depth analysis of this name can be quite revealing. However, to complete the ancestral picture, the mother's maiden name (on both sides of the family) is just as important. Looking back through both branches of your lineage will help you detect which side of the family you resemble most closely, and which traits you share. In short, you are at the end of a long line of predecessors, having inherited a wide range of characteristics. Your name and the names of your ancestors reveal centuries of accumulated energies and influences that are part of your makeup today.

EXAMINING NAMES

A name can be mined for sources of insight in a variety of ways. We consider the sum of the vowels, the sum of the consonants, and the sum of all letters combined. Additionally, each vowel and consonant is examined separately and in the order of appearance. Information is also gleaned from the absence of certain numbers as well as those appearing most frequently. The Spiritual Transit cycles provide valuable information as well. Every ancestor who carried your last name went through the same Spiritual Transit cycles during the same ages you did.

The custom of a woman assuming her husband's name has a considerable impact on her personality and experiences. In doing so, she quite literally surrenders part of her identity and inner/spiritual path. This does not necessarily create discord and often affects the relationship positively. However, it is something to think about if you are contemplating marriage or divorce. Considering the effect, a name imparts, a divorced woman might consider reclaiming her maiden name to recoup the part of her identity forfeited during the marriage. The decision to adopt a partner's name requires the same forethought for same sex marriages.

SOURCES OF STRENGTH, SURVIVAL AND STAMINA

To understand your relationship to your ancestors, it is important to recognize that each aspect analyzed is focused on a specific facet of your ancestors' makeup. For example, in one chapter you might learn some of your ancestors likely lived on the darker fringes of society, while the next chapter suggests an innate desire for honor and justice motivated many of their choices. While this appears to be a contradiction, it probably isn't. Think of it as the "Robin Hood syndrome" where thievery and honor occupy the same heart; we all possess contradictions in our personality and the approaches we take to various issues.

This chapter centers on the dominant source of strength that helped your ancestors survive and prosper.

The 4 ruled your ancestors sources of strength, survival, and stamina

The name Brown suggests a fair number of your ancestors had one important asset in common: they were not afraid to put forth effort to achieve their goals. Most of them probably lived very productive lives, overcoming obstacles by the sheer strength of their will and a stubborn resolve to persevere.

On the downside, there may have been a few frustrated and angry bullies among your people who envied the apparent ease others had in finding success (while they worked hard for little reward). This may have tempted some of your less restrained predecessors to use their physical and mental strength against those who were weaker.

YOUR ANCESTOR'S MOTIVATIONAL DRIVE

This aspect describes what motivated your ancestors and what attracted and interested them.

The 3 reflects your ancestors' motivational drive

It is likely that many of your Brown ancestors became artists and artisans of some caliber. Their overwhelming motivation was the need to create and produce beautiful things that would enrich the lives of others. Many were quick-witted and verbally gifted. This probably helped them acquire financial support since throughout the ages artisans and artists have needed a patron™s backing. However, a lack of follow through is also reflected in your ancestors™ name, suggesting some may have died disillusioned or in reduced means.

DEALING WITH DIFFICULTY

The following chapter reveals what can best be described as your ancestors' fortitude - the ways

they dealt with adversity, obstacles, illness, or poverty, or simply how they held fast against the tide of changing circumstances. These characteristics helped your ancestors overcome odds many could not and were a determining factor in the choices they made and lifestyles they adopted.

Your ancestors' ability to deal with difficulty was ruled by the 1

The foundation of your ancestor's™ strength is often found in the confrontational attitude that influenced them to stand and defend against negative circumstances, man-made or natural. Submission does not appear to have been in their DNA. At times, this may have caused them to fight even when a compromise would have ultimately benefited them. The motto "I prefer to die on my feet than to live on my knees," would ring true for many with the name Brown. With few exceptions, they were likely strong, independent, individualistic, and had a fair number of eccentrics.

A SHARED PASSION AMONG YOUR ANCESTORS

Emily, this section reveals a specific trait or dominant quality held by many of your predecessors. Although this report is built using the last name only, it reveals one area where a characteristic was likely shared almost universally among all with that surname, regardless of the first and middle names.

Your ancestors' shared passion

Freedom was the defining goal for many of your ancestors. This name indicates they were a rebellious lot who disliked any form of restriction or control.

CAREERS AND TALENTS

This section reflects attributes or a mindset that likely attracted your ancestors to a particular profession. Although other variables in the chart may have altered these influences and lead them to different choices, they probably had some interest in the trades and professions mentioned below. Let's take a quick look at the key qualities and attributes reflected in your predecessors' last name.

Your ancestors' aptitude to certain careers and talents

Protective, stable, and caring. The most common professions among your Brown ancestors probably included farmers, woodworkers, politicians, counselors, and healers.

WEAKNESSES, CHALLENGES, AND TRIUMPHS

This chapter looks at a probable weakness that was relatively common among your ancestors. It would have been necessary for them to overcome this shortcoming to be successful in life. Keep in mind that this is a negative influence, and not every predecessor was affected by it. This aspect is often diminished or completely eliminated if a first or middle name balances it.

The 2 represents your Ancestors ability to overcome weaknesses

The number in this area of your chart suggests a good many of your Brown ancestors were overly sensitive and affected by the expectations of others. Due to this tendency they may have suppressed themselves to avoid feeling conspicuous.

They would have been more likely than others to be the target of gossip or false accusations, partly because they fit the role of victim. When faced with real or perceived criticism, many would have retreated rather than confront their accuser directly. In extreme cases, their hypersensitivity may have caused fear, timidity, and even paranoia.

At least some of your Brown forebears were likely to face this type of challenge, but it was also balanced by the positive traits that accompany being sensitive: high intuition, excellent negotiating skills, and a harmonious nature. They had an antenna for other people's hopes, feelings, and expectations - a trait good politicians are born with.
